FOR IMMEDIATE RELEASE**TEXTSTYLE LAUNCHES NEW MESA LIGHT FILTERING AND UPDATED BLACKOUT FABRIC COLLECTION**

October 13, 2020 Stamford, CT – Rollease Acmeda, a global leader in the window covering industry, is pleased to announce the latest introduction to their extensive line of specialty designer fabrics under their Textstyle brand, the Mesa Collection. The Mesa Collection was previously available as a commercial blackout only collection. The launch introduces a new light filtering collection inclusive of five soft, neutral colors matched perfectly to the blackout collection.

“Mesa has been an integral part of our fabric offering since 2013 and we are excited about the refresh. The addition of the light filtering version offers a high level of privacy while still allowing light into the room, providing designers another option to maintain privacy without complete light blockage,” stated Jessica Bondell, Textstyle Senior Product Manager.

Mesa blackout received a complete refresh offering a total of fourteen modern, cosmopolitan colors delivering a timeless window covering fabric solution ideal for commercial and residential application. Bondell added, “The new colors are driven by designer input and focus heavily on calming tones of neutrals and grays. We believe this refresh is what the design world needed to meet modern-day design trends in commercial and residential projects.”

Fabricators and retailers with digital printing capabilities can utilize both Dove White light filtering and blackout as a base fabric for custom printed patterns. Pre-established HP Digital Latex print profiles are available to support a seamless setup of the print operation.

Innovation carried into Tuxedo Blackout which features a Dove White front with a charcoal gray backing making the fabric virtually disappear from exterior view when paired with any specialty glazed window. Tuxedo Blackout also supports digital printing capabilities for a custom solution.

Backed by a 10-year warranty, Mesa is a PVC-free collection with NFPA-701 classification, Oeko-Tex Standard 100 and Greenguard Gold certification, a Health Product Declaration and ISO-9001 designation supporting the commercial specification process. It comes available in 118”

wide width to accommodate large window installations. Both Mesa light filtering and blackout are in stock and available now.
