

AMBIENT RENEW

PVC FREE SOLAR SCREEN

TEXSTYLE

Product Name: Ambient Renew, Fabric for Solar Shading Systems

TEXSTYLE, a division of Rollease Acmeda, conforms to the following product content restrictions per the

International Living Future Institute, Red List (LBC-Red-List-CASRN-Guide-2023)

This self-declared material ingredient statement was gathered by Rollease Acmeda, in accordance with ISO 17050-1: 2004 General Requirements for a Conformity Assessment and ISO 17067: 2013. All raw materials were inventoried to 100 ppm (.01%) and then screened for prohibited substances per the document that provides guidance for institutions and suppliers wishing to comply with the requirements set forth by the International Living Future Institute's Red List.

These products DO NOT contain:

- Chemicals, screened by CAS RN, per the document
LBC-Red-List-CASRN-Guide-2023

This PVC FREE screen fabric is made with 85% Repreve® recycled polyester fibers and 15% Virgin Polyester fibers. This fabric is Fire Retardant meeting the requirements of both NFPA-701 and CA Title 19, and emits low VOC of less than .5mg/m3 in accordance with CDPH Standard Method V1.2. It is also Lead Free, Phthalate Free, Formaldehyde Free, Fragrance Free, and Recyclable.

To comply with these above standards and requirements, the supplier certifies to the best of its knowledge that the product(s) are manufactured with quality controls to ensure conformity to the above referenced standard.
