

Ambient Renew Reclaim Program

Texstyle and its parent company Rollease Acmeda, are proud supporters of shading solutions that make the window coverings industry more sustainable.

Ambient Renew is an eco-friendly fabric made with 85% REPREEVE® Recycled Polyester. Customers now have the opportunity to recycle Ambient Renew at the end of its lifespan, transforming it into new REPREEVE products. Make a difference with us and Ambient Renew in our effort to preserve our world.

Through the Ambient Renew Reclaim Program, Texstyle will reclaim end of life fabric from program participants to be renewed into a second generation of REPREEVE fiber which may be re-purposed into clothing, upholstery, or new Ambient Renew fabric!

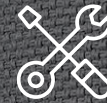

Thank You For Your Interest

Participation in the Ambient Renew Reclaim Program represents a significant commitment to reducing landfill waste, recycling materials, and preserving our natural environment for future generations.

For more information please contact Texstyle
E. info@texstyle.com | P. +1 800 552 5100

Step 1 | Prepare

Return Ambient Renew fabric only (including fabric from fabricated shades and production remnants). Please remove any shade hardware or components. If fabric is still on the roll, please unroll and detach the fabric from the roll completely.

Step 2 | Package

Return fabric in a standard Gaylord size box or pallet container. Please contact Texstyle for approval on alternate packaging sizes.

Step 3 | Ship

Upon receipt of the fabric, Texstyle will coordinate all recycling procedures, and you can rest assured that your used window shade fabric will be re-purposed for consumption again. *Return shipping not included.*
